Describing my datatset:

Usage: to track the importance and change of Supreme Court Cases/Justices

Variables:

CaseID (Character): A unique identifier for each case (e.g., 2024-001).
CaseName (Character): The name of the case (e.g., Smith v. Jones).
DecisionDate (Date): The date the opinion was issued (e.g., 2024-01-15).
MajorityOpinionAuthor (Character): The justice who wrote the majority opinion (e.g., Justice John Doe).
DissentingJustices (Character): A list of justices who dissented, separated by commas (e.g., Justice Jane Smith, Justice Bob Brown).
ConcurringJustices (Character): A list of justices who wrote or joined a concurring opinion, separated by commas (e.g., Justice Alice Johnson).
LegalArea (Character): The area of law the case pertains to (e.g., Civil Rights, Environmental Law, Criminal Law).
VoteSplit (Character): The numerical split of the vote (e.g., 5-4, 7-2).
OpinionText (Character): The full text of the majority opinion (this would be a lengthy text field).
DissentingOpinionText (Character): The full text of the dissenting opinion(s), if any (also a lengthy text field).
ConcurringOpinionText (Character): The full text of the concurring opinion(s), if any (again, a lengthy text field).
Keywords (Character): Key terms or phrases relevant to the case, separated by commas (e.g., First Amendment, due process).
Citation (Character): The official citation of the case (e.g., 123 U.S. 456).
LowerCourtOutcome (Character): The outcome of the case in the lower court before reaching the Supreme Court (e.g., Overturned, Affirmed).

Details:

We track the Supreme Court cases from 2020-2023.
